- On-line/Off-line PC Operation Log
- Network Access Log
- Web Sites Visited Log
- Email Sent Log
- One Year Storage Log

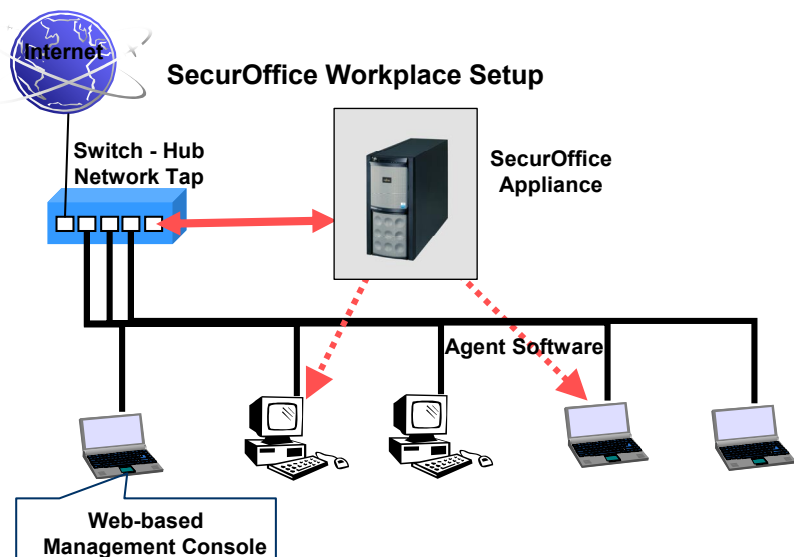

PC Asset Management:

- Hardware Inventory (Disk Usage, Configuration)
- Software Inventory & Installation Log

SecurOffice, with downloadable Agent Software, is an easy-installation and quick-deployment system that doesn't require security expertise to deploy and operate. The PC prohibition policies are easy to setup by just applying necessary modification on pre-defined policies.

Predefined summary and detailed security reports provide a quick view of security risks to your network.

Advanced Web spreadsheets make data analysis easy and manageable. Remote upgrade of server software makes maintenance an easy task.
